

China Hybrid Energy construira 400 000 stations de base 5G l annee prochaine

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How 5G technology is transforming China's economy?

According to MIIT data, 5G technologies have been integrated into 71 major economic categories in China.

Zhao Ziguang, the ministry's chief engineer, said the ministry will continue to promote the digital transformation of industries and carry out the AI Plus initiative to speed up new industrialization empowered by digital technologies.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom.

In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology.

With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

How many 5G subscribers are there in China?

The number of 5G mobile subscribers hit 966 million in China.

The country has seen its 5G network and commercialization develop rapidly in recent years.

Its 5G network now covers every city and town, as well as more than 90 percent of villages.

China's 5G standard essential patent declarations account for 42 percent of the global total.

Does China have a 5G network?

Wen Ku, director-general of the China Communications Standards Association, highlighted the nation's progress in telecommunications, stating, "China has made remarkable strides in 5G infrastructure, which gives it an unparalleled edge in exploring 6G technologies."

China aims to establish 38 5G base stations per 10,000 residents by end-2027. China is targeting a 5G user penetration rate exceeding 85% by the end of 2027, as it...
